

THE USE OF THE APPLICATION OF DERIVATIVES:

Our project will be a proof to show people that the application of derivatives will be useful when applied to real life. In this video, we will use 3 boxes as a proof that it has the same volume of 250cm^3 , but with the different size, the cost of each one will be different as well. Within this case, we will use the application of derivatives to help us determine the size of the box that cost less.
